common places readings in american vernacular arch

Understanding the concept of "places" within American vernacular architecture is essential for appreciating how cultural, environmental, and historical factors influence the built environment across the United States. "Common places readings" in this context refer to the recurring architectural features, spatial arrangements, and stylistic elements that appear across different regions and periods of American vernacular architecture. These elements serve not only functional purposes but also embody social values, regional identities, and adaptations to local climates. This article delves into the key "places" or recurrent themes that are characteristic of American vernacular architecture, exploring how they manifest across various regions and what they reveal about American cultural history.

Understanding American Vernacular Architecture

Definition and Significance

American vernacular architecture encompasses the traditional, often locally sourced, and functionally driven building styles that developed without formal architectural training. These structures reflect the practical needs, available materials, and cultural influences of their communities. Unlike high-style or architect-designed buildings, vernacular architecture is characterized by its adaptability and regional specificity.

Origins and Evolution

Vernacular architecture in America evolved from indigenous building practices, European settlers' traditions, and later, adaptations to new environments and technological innovations. Over time, these structures became emblematic of local identities and social histories, with certain "places" or recurring features becoming hallmarks of American vernacular design.

Common Places in American Vernacular Architecture

This section explores the key recurring "places" or features and spatial arrangements that are prevalent across American vernacular architecture. These include building types, stylistic elements, regional adaptations, and spatial configurations.

1. The Front Porch as a Social and Architectural Place

Function and Cultural Significance

The front porch is arguably one of the most iconic features in American vernacular architecture. It functions as a transitional space between public and private realms, serving as a venue for social interaction, relaxation, and community engagement.

Regional Variations

- Southern Vernacular Homes: Often feature large, wrap-around porches suitable for social gatherings in warm climates.
- Southern Colonial and Federal Styles: Incorporate prominent porticoes with columns, emphasizing formality and grandeur.
- Front Porch as a "Place": Acts as an extension of the living space, fostering neighborhood interactions and embodying the American value of community.

2. Gabled Roofs and Their Regional Significance

Commonality and Purpose

Gabled roofs are a dominant feature in American vernacular architecture, valued for their practicality in shedding snow and rain, especially in colder or wetter regions.

Regional Variations

- Saltbox Houses (New England): Characterized by long, pitched gabled roofs sloping down to the rear, maximizing interior space.
- Dutch Colonial Gables (Mid-Atlantic): Feature stepped or curved gables, reflecting Dutch influence.
- Simple Gable Roofs in Rural Areas: Focused on functionality, easy to construct with locally available materials.

3. Use of Local Materials as a Regional "Place"

Materials and Their Cultural Context

Vernacular architecture often employs locally sourced materials, which shape regional identities and influence architectural forms.

Examples by Region

- Adobe and Stucco in the Southwest: Reflecting Spanish and Indigenous influences, adapted to arid climates.
- Log Cabins in the Appalachian and Great Lakes Regions: Using timber readily available in forested areas.
- Brick Row Houses in Northeastern Cities: Demonstrating urban adaptation and industrial influences.

Functionality and Cultural Identity

Barns are quintessential rural "places" in American vernacular, serving as functional structures for agriculture and livestock while also embodying regional architectural styles.

Regional Styles and Variations

- Gambrel Roof Barns (Midwest and Northeast): Maximizing storage space for hay and equipment.
- Pole Barns (Southern and Western States): Simpler structures built with minimal materials.
- Bank Barns (Northeast): Built into hillsides for easy access to different levels.

5. The "Main Street" and Commercial Vernacular Buildings

Community and Economic "Places"

Small-town commercial buildings and storefronts represent the social and economic centers of communities, often reflecting regional stylistic tendencies.

Design Elements

- False Fronts: Common in Western frontier towns, giving buildings a larger facade.
- Brick Cornices and Signage Spaces: Typical in Northeastern commercial districts.
- Wood Frame Structures: Found in rural main streets, often with simple, functional designs.
