Common Fishery Questions from WAEC 2014 and Their Answers

Below are some of the most frequently encountered questions from the 2014 WAEC Fishery exam, along with detailed answers to aid your studies.

1. Define Fisheries and Explain Its Importance

Question:

Define fisheries and discuss its importance to the economy.

Answer:

Fisheries refer to the industry or activity of catching, processing, and selling fish and other aquatic organisms. It encompasses both wild capture fisheries and aquaculture (fish farming). Fisheries are crucial to the economy because they provide food security, employment, and income for millions of people. They contribute to foreign exchange earnings through exports and support related industries such as processing, packaging, and transportation.

Key Points:

- Fisheries include all activities related to catching aquatic animals.
- They supply protein-rich food to populations.
- They generate employment in fishing, processing, and marketing sectors.
- They contribute significantly to national income and foreign exchange.

2. List and Describe Different Types of Fishing Gear

Question:

Identify and explain three types of fishing gear used in fisheries.

Answer:

The main types of fishing gear include:

- **Gill Nets:** These are vertical panels of netting with mesh sizes designed to catch fish by their gills. Fish swim into the net and get entangled by their gills, making it easy to capture them.
- **Traps:** These are devices or cages used to trap fish. They are often baited and allow fish to enter but prevent their escape.
- **Long Lines:** This gear consists of a main line with numerous baited hooks spaced at intervals. It is used to catch large pelagic fish like tuna and billfish.

Additional Notes:

- Each gear type is chosen based on target species and fishing environment.
- Proper selection and handling of gear are essential for sustainable fishing.

3. Explain the Concept of Fish Stock Conservation

Question:

What is fish stock conservation, and why is it important?

Answer:

Fish stock conservation involves managing fish populations to prevent overfishing, ensure

sustainable yields, and maintain ecological balance. It includes measures such as setting catch limits, establishing closed seasons, and protecting breeding habitats.

Importance:

- Prevents depletion of fish populations.
- Ensures continuous availability of fish for future generations.
- Maintains biodiversity within aquatic ecosystems.
- Supports the livelihoods of fishing communities.

4. Describe Methods of Fish Preservation

Question:

Outline three methods used in preserving fish after harvest.

Answer:

Three common fish preservation methods include:

- **Salting and Drying:** Fish are heavily salted to draw out moisture and then sun-dried or smoked. This process inhibits bacterial growth.
- **Freezing:** Fish are kept at low temperatures using refrigerators or ice packs, slowing down microbial activity.
- **Canning:** Fish are cooked, packed in sterilized containers, and heat-treated to kill bacteria, allowing long-term storage.

Additional Tips:

- Proper preservation extends shelf life and maintains nutritional value.
- Combining methods (e.g., freezing and smoking) can improve preservation quality.

Additional Key Topics Covered in WAEC Fishery 2014

Beyond the core questions, the 2014 WAEC exam also tested students on various other topics vital to fisheries science.

1. Fish Anatomy and Biology

Understanding fish anatomy helps in identifying species and understanding their behavior. Key areas include:

- Body structure and parts (e.g., fins, scales, gills)
- Reproductive habits and life cycles
- Habitat preferences and feeding habits

2. Aquaculture Practices

The exam emphasized sustainable fish farming techniques, including:

- Selection of suitable species for farming
- Water quality management
- Feeding regimes and disease control

3. Environmental Impact of Fisheries

Students were expected to understand how overfishing, pollution, and habitat destruction affect aquatic ecosystems. The importance of conservation measures was a recurring theme.
