2. Building Height Restrictions

Height restrictions are crucial for maintaining urban aesthetics, safety, and infrastructure capacity.

Typical norms include:

- Maximum height limits: Vary depending on zone, location, and proximity to airports or sensitive areas.
- Special provisions: For high-rise developments, special permissions and environmental clearances are required.

Example:

- Residential buildings in core city areas might be restricted to 12-15 meters.
- Outskirts and industrial zones may permit taller structures, subject to safety standards.

3. Setback and Frontage Regulations

Setbacks ensure adequate space around buildings for light, ventilation, and emergency access.

Standards include:

- Front setback: Usually between 3 to 6 meters, depending on road width and zoning.
- Side and rear setbacks: Typically 2 to 3 meters, but can vary based on plot size and usage.

Impact:

- Dictates the maximum permissible built-up area.
- Ensures public spaces and roads are not obstructed.

4. Floor Area Ratio (FAR) and Coverage

FAR determines the total permissible built-up area on a plot.

Guidelines:

- Residential plots: FAR generally ranges from 1.5 to 2.0.
- Commercial plots: FAR can go up to 3.0 or higher, depending on zone.
- Coverage ratio: Usually limited to 60-70%, controlling the ground coverage of the building.

Implication:

- Promotes optimal land utilization.
- Prevents overcrowding and overbuilding.

5. Structural and Safety Standards

The bye laws mandate adherence to safety protocols:

- Use of quality construction materials.
- Structural stability under load and seismic conditions (Belgaum falls under Zone II or III for seismic zones).
- Proper foundation design, especially in areas prone to flooding or unstable soil.

Additional safety measures:

- Fire safety provisions including fire exits, alarms, and hydrants.
- Earthquake-resistant construction norms.

6. Environmental Regulations

- Eco-sensitive zones: Construction near water bodies or green zones must adhere to environmental clearance norms.
- Rainwater harvesting: Encouraged or mandated for certain building sizes.
- Waste management: Regulations for waste disposal and sewage treatment.
